---

FYI – ground water sample was collected from a private well & results sent to us by Jackie Young – well location/depth unknown at this point. I plan to discuss this with her & then send this to our partner agencies & Jackie. Harris County is preparing to do their own water well sampling but timing is unknown now.

Gary,

The private well fingerprint looks nothing like the sediments fingerprint from the waste pits, BUT interestingly enough, it looks VERY similar to the upstream reference sediments. Looks like what they're seeing in the well water is basically background. See attached.
